

Investor Presentation

August 2026

Caution Regarding Forward-Looking Statements

Bank of Montreal's public communications often include written or oral forward-looking statements. Statements of this type are included in this document and may be included in other filings with Canadian securities regulators or the U.S. Securities and Exchange Commission, or in other communications. All such statements are made pursuant to the "safe harbor" provisions of, and are intended to be forward-looking statements under, the United States Private Securities Litigation Reform Act of 1995 and any applicable Canadian securities legislation. Forward-looking statements in this document may include, but are not limited to: statements with respect to our objectives and priorities for fiscal 2026 and beyond, including our medium-term objectives; our strategies, ambitions or future actions; our targets and commitments; our plans to drive business value through the use of technology such as artificial intelligence (AI) and enhance related offerings and client experiences; expectations for our financial condition, capital position, the regulatory environment in which we operate, the results of, or outlook for, our operations or the Canadian, U.S. and international economies; customer growth and support, and inclusivity and development; and include statements made by our management. Forward-looking statements are typically identified by words such as "will", "would", "should", "believe", "expect", "objective", "anticipate", "project", "intend", "estimate", "plan", "goal", "commit", "target", "may", "might", "schedule", "forecast", "outlook", "timeline", "suggest", "seek" and "could" or negative or grammatical variations thereof.

By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties, both general and specific in nature. There is significant risk that predictions, forecasts, conclusions or projections may change over time, will not prove to be accurate, that our assumptions may not be correct, and that actual results may differ materially from such predictions, forecasts, conclusions or projections. We caution readers of this document not to place undue reliance on our forward-looking statements, as a number of factors – many of which are beyond our control and the effects of which can be difficult to predict – could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed in the forward-looking statements.

The future outcomes that relate to forward-looking statements may be influenced by many factors, including, but not limited to: general economic and market conditions in the countries in which we operate, including labour challenges and changes in foreign exchange and interest rates; political conditions, including changes relating to, or affecting, economic or trade matters, including tariffs, countermeasures and tariff mitigation policies; changes to our credit ratings; cyber and information security, including the threat of data breaches, hacking, identity theft and corporate espionage, as well as the possibility of denial of service resulting from efforts targeted at causing system failure and service disruption; technology resilience, innovation and competition; technological change, including the use of data and AI in our business, including generative AI, the evolution of consumer behaviour, and our ability to gather, analyze and verify data; failure of third parties to comply with their obligations to us; disruptions of global supply chains; environmental and social risk, including climate change; the Canadian housing market and consumer leverage; inflationary pressures; changes in laws, including tax legislation and interpretation, or in supervisory expectations or requirements, including capital, interest rate and liquidity requirements and guidance, including if the bank were designated a global systemically important bank, and the effect of such changes on funding costs, liquidity and capital requirements; changes in monetary, fiscal or economic policy; weak, volatile or illiquid capital or credit markets; the level of competition in the geographic and business areas in which we operate; exposure to, and the resolution of, significant litigation or regulatory matters, our ability to successfully appeal adverse outcomes of such matters and the timing, determination and recovery of amounts related to such matters; the accuracy and completeness of the information we obtain with respect to our customers and counterparties; our ability to successfully execute our strategic plans, initiatives and objectives under expected timeframes, or at all, or with the results or outcomes originally expected or anticipated; our ability to successfully complete acquisitions or dispositions and integrate acquisitions, including obtaining regulatory approvals, and realize any anticipated benefits from such plans and transactions; critical accounting estimates and judgments, and the effects of changes in accounting standards, rules and interpretations on these estimates; operational and infrastructure risks, including with respect to reliance on third parties; global capital markets activities; the emergence or continuation of widespread health emergencies or pandemics, and their impact on local, national or international economies, as well as their heightening of certain risks that may affect our future results; the possible effects on our business of war or terrorist activities; natural disasters, such as earthquakes or flooding, and disruptions to public infrastructure, such as transportation, communications, power or water supply; and our ability to anticipate and effectively manage risks arising from all of the foregoing factors.

We caution that the foregoing list is not exhaustive of all possible factors. Other factors and risks could adversely affect our results. For further information, please refer to the discussion in the Risks That May Affect Future Results section, and the sections related to credit and counterparty, market, liquidity and funding, operational non-financial, legal and regulatory compliance, strategic, environmental and social, and reputation risk in the Enterprise-Wide Risk Management section of BMO's 2025 Annual Report, and the Risk Management section in our Third Quarter 2026 Report to Shareholders, all of which outline certain key factors and risks that may affect our future results. Investors and others should carefully consider these factors and risks, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. We do not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time by the organization or on its behalf, except as required by law. The forward-looking information contained in this document is presented for the purpose of assisting shareholders and analysts in understanding our financial position as at and for the periods ended on the dates presented, as well as our strategic priorities and objectives, and anticipated performance as at and for the periods ended on the dates presented, and may not be appropriate for other purposes.

Material economic assumptions underlying the forward-looking statements contained in this document include those set out in the Economic Developments and Outlook section, and for each operating segment under 2026 Areas of Focus and Business Environment and Outlook, of BMO's 2025 Annual Report, as updated in the Economic Developments and Outlook section and Risk Management – Geopolitical and Trade Developments section in our Third Quarter 2026 Report to Shareholders, as well as in the Allowance for Credit Losses section of BMO's 2025 Annual Report, as updated in the Allowance for Credit Losses section in our Third Quarter 2026 Report to Shareholders and subsequent quarterly reports to shareholders. Assumptions about the performance of the Canadian and U.S. economies, as well as overall market conditions and their combined effect on our business, are material factors we consider when determining our strategic priorities, objectives and expectations for our business. Assumptions about BMO expected financial performance (including balance sheet, income statement and regulatory capital figures), consideration received, applicable taxes, estimated values of transaction-related assets and liabilities, expected closing dates of the proposed divestitures, transaction costs, foreign exchange rates, and assumed accounting treatment were considered in estimating the impact of the divestitures on BMO's CET1 ratio. In determining our expectations for economic growth, we primarily consider historical economic data, past relationships between economic and financial variables, changes in government policies, and the risks to the domestic and global economy.

Other Disclaimers

This document includes voluntary disclosures on customer growth and support, climate related opportunities and risks, governance, strategy, risk management and metrics and targets that may not be, and are not required to be, incorporated into our mandatory disclosures, where we use a definition of materiality established under applicable securities laws for the purpose of complying with the disclosure rules and regulations promulgated by applicable securities regulators and applicable stock exchange listing standards.

Commitment to Sustainability

BMO's sustainability and climate strategy and approach are key to advancing our commercial objectives, effectively managing risk, promoting efficiencies in our business and maintaining positive stakeholder relations. Our areas of focus include:

Sustainability Governance

Managing our business consistent with our long-term risk management and financial goals, considering our impact on communities, society and stakeholders

- Oversight by the **Board of Directors and management**
- Understanding and **managing** our exposure to **environmental and social risks**
- Responsible **business conduct**
- **Fair design and sale** of financial products and services
- **Protecting the privacy** of personal information and **safeguarding customer data**
- Executing our Digital First, AI-powered strategic priority using **responsible AI principles**

Environmental Sustainability

Advancing our climate strategy and execute our Climate Ambition to be our client's lead partner in their pursuit of energy and climate resilience

- Executing on our **climate transition action plan** to manage our business through the energy transition across our value chain
- Reducing our **operational emissions** and working with suppliers to manage emissions associated with our purchasing
- Executing our **climate commercialization** strategy
- **Building capabilities** through employee engagement and **BMO Climate Institute**
- Embedding **climate risk considerations** into our Enterprise Risk Management Framework

Social Sustainability

Strengthening the communities where we do business, building relationships with stakeholders and fostering an engaged workforce

- Supporting community, economic, and environmental resilience through **giving and volunteering**
- Deepening our partnerships with **Indigenous communities**, supporting reconciliation
- Serving the needs of our customers, expanding **access to financial services**
- Helping customers **build financial literacy** to make informed financial decisions
- Empowering **our people** through a high-performing, inclusive culture

Sustainability Solutions

Offering a range of products and services that help our clients achieve their sustainability and risk management objectives

- Helping clients seeking to **integrate sustainability** into their strategic planning and financing activity
- Advising clients on **carbon markets** and **environmental commodity** trading
- Implementing a **responsible investing** approach to create financial value and mitigate financial risk
- Raising capital through our own issuance of **green, social or sustainable bonds**

We aim to follow applicable standards and frameworks that guide our priorities and disclosures, underpinned by a robust governance framework

This page contains forward-looking statements. Refer to the Caution Regarding Forward-Looking Statements on page 2

Our sustainability and climate reporting can be found on our website at our-impact.bmo.com/reports

Q3'26 Highlights

Q3'26 – Financial Highlights

Continued momentum with double-digit PPPT¹ growth, positive operating leverage and ROE expansion

Y/Y Highlights:

- Adjusted² net income up 19% (reported down 25%)
 - Q3'26 adjusted² items included \$973MM after-tax charge largely related to goodwill from announced sale of Transportation and Vendor Finance businesses, and \$63MM change in fair value of contingent consideration related to Burgundy
- Adjusted² ROE of 14.0% and ROTCE³ of 18.0% (reported 8.4% and 11.3%, respectively)
- Adjusted² PPPT¹ up 13% (reported down 17%)
- Adjusted² revenue up 11% (reported up 10%)
 - Strong growth in Wealth Management and Capital Markets
 - NIM expansion and volume growth in Canadian P&C and U.S. Banking
- Adjusted² expenses up 9% (reported up 31%)
- Adjusted² operating leverage positive 1.6% (reported negative 20.7%)
- Total PCL \$722MM
 - PCL on impaired loans \$708MM or 41 bps⁵
 - PCL on performing loans \$14MM
- U.S. Operations⁴ contributed 39% to adjusted² earnings in the quarter (6% to reported)

(\$MM)	Reported			Adjusted ²		
	Q3'26	Y/Y	Q/Q	Q3'26	Y/Y	Q/Q
Revenue	9,896	10%	3%	9,959	11%	4%
Expenses	6,678	31%	25%	5,472	9%	5%
PPPT ¹	3,218	(17)%	(24)%	4,487	13%	3%
Provision for Credit Losses (PCL)	722	\$(75)	\$(17)	722	\$(75)	\$(17)
Net Income	1,750	(25)%	(33)%	2,859	19%	5%
U.S. Operations ⁴ Net Income (US\$)	68	(90)%	(89)%	794	13%	11%
Diluted EPS (\$)	2.38	(\$0.76)	(\$1.15)	3.96	\$0.73	\$0.29
Efficiency Ratio (%)	67.5	1,070 bps	1,180 bps	54.9	(90) bps	50 bps
ROE (%)	8.4	(320) bps	(460) bps	14.0	200 bps	50 bps
ROTCE ³ (%)	11.3	(430) bps	(600) bps	18.0	240 bps	40 bps
ROA ⁶ (%)	0.44	(20) bps	(27) bps	0.72	6 bps	(1) bps
CET1 Ratio ⁷ (%)	13.0	(50) bps	- bps	13.0	(50) bps	- bps

1-3 Refer to the Non-GAAP section on pages 59-63

4 Refer to endnotes on pages 54-56

5-7 Refer to glossary on pages 57-58 for description of this measure

Capital Position

Strong capital generation supporting business growth and shareholder returns

Q/Q Highlights:

- Q3'26 CET1 ratio¹ of 13.0%, unchanged from Q2'26 primarily reflecting:

- Internal capital generation

Offset by

- 3.8MM common shares repurchased
- Higher source currency RWA
- On closing, the announced divestitures are expected to add approximately 50 bps to the bank's CET1 ratio^{1,2}
- Announced intention to establish a new NCIB for up to 25MM common shares, commencing upon expiry of the current NCIB, subject to regulatory approvals

- Q3'26 RWA of \$454.8B, up from Q2'26 primarily reflecting:

- FX movements
- Higher market risk driven by movement in risk levels
- Higher credit risk driven by an increase in asset size, partially offset by changes in asset quality
- Higher operational risk driven by higher 3-year average revenue

Common Equity Tier 1 (CET1) Ratio¹

Risk Weighted Assets (RWA) (\$B)

This slide contains forward-looking statements. Refer to the Caution Regarding Forward-Looking Statements on slide 2

¹ Refer to glossary on pages 57-58 for description of this measure

²⁻⁴ Refer to endnotes on pages 54-56

Net Interest Margin¹ and Interest Rate Sensitivity

NII (\$MM) and NIM ex. Global Markets and Insurance² (%)

- NII ex. Global Markets up 5% Y/Y
 - Higher net interest margin and good loan growth across businesses
 Partially offset by:
 - Lower NII in Corporate Services
- Total bank NIM ex. Global Markets and Insurance down 3 bps Q/Q
 - Continued higher deposit margins, including the benefit of ladder reinvestment rates and deposit mix improvements
 More than offset by:
 - Lower Corporate Services NII and higher low-yielding assets
 - Change in balance sheet mix

This page contains forward-looking statements. Refer to the Caution Regarding Forward-Looking Statements on page 2.

1 Refer to glossary on pages 57-58 for description of this measure

2 Refer to endnotes on pages 54-56 and reconciliation on page 62

3-5 Refer to endnotes on pages 54-56

Earnings sensitivities over the next 12 months³

Q3'26 Pre-Tax CDE (\$MM)	+100 bps	-100 bps	+25 bps	+25 bps Short rate	-25 bps	-25 bps short rate
Canada ⁴	110	(118)	29	(2)	(32)	0
U.S.	181	(200)	48	36	(49)	(37)
Total	291	(318)	77	34	(82)	(37)

- Earnings benefit/exposure to an incremental +/- 100 bps rate shock reflects a relatively neutral position
- BMO's strategy emphasizes margin stability; non-rate sensitive deposits and the balance sheet's net equity position are consistently reinvested into intermediate tenors through the cycle
- Strong liquidity position is supporting the bank's ability to manage deposit costs

CAD / USD Swap Rates⁵

Wealth Management: A One Client catalyst, accelerating growth and elevating ROE

Distinctive Strengths

- Strong, stable & scaled; diversified, high ROE business
- World-class client experience, supporting clients in solving their most complex problems
- One Client catalyst, connecting across the full power of BMO
- Leader in client-centric innovation
- Winning Culture; talent to deliver on client ambitions

2026 Strategic Priorities

- Be a Canadian leader in financial advisory services and accelerate our One Client approach to deliver a world-class client experience
- Strengthen our position as a solutions provider through innovative and competitive asset management and insurance offerings that help grow and protect the financial interests of our clients
- Accelerate digital and AI-powered solutions that drive client value, while continuing to modernize technology and enhance productivity
- Foster a winning, high-performance culture through collaboration, innovation and inclusion, with a focus in attracting, developing and retaining talent

Portfolio Spotlights

Non-Bank Financial Institutions (NBFI) (\$77.4B)

- Well-diversified products with a common foundation of disciplined client selection, robust structuring, active management by specialized teams and supported by strong monitoring controls
- ~54% Equity Subscription loans, short tenor, primarily uncommitted financing, generally secured with pledge of uncalled capital commitments from largely investment grade institutional investors. Investment & Mutual Funds (18%), Finance Companies (15%), and other (13%, including insurance and broker-dealer borrowers) make up remainder of portfolio
- Strong risk profile, 0% GIL; 10-year average annual PCL of 1 bp

Financing Products (\$14.6B)

- Secured lending against diversified pools of business and consumer loans, including residential mortgages
- Typically financed through a non-recourse special purpose vehicle, that benefits from favourable capital treatment and structural protections
- Governed by conservative advance rates, concentration limits, first loss protections and ongoing valuation and monitoring requirements
- Strong risk profile, 0% GIL; 10-year average annual PCL of <1 bp

Private Credit represents < 1% of total loans

Commercial Real Estate

- Commercial Real Estate (CRE) portfolio of \$79.9B represents 11% of total gross loans & acceptances
- Well-managed with consistent and conservative underwriting standards; investment grade (47%), watchlist (3%) and impaired (1%)
- Portfolio is well-diversified across businesses, property types and geographies

Canada

- The Canadian economy is expected to expand modestly in 2026, supported by expansionary fiscal policies but restrained by uncertain trade policies that are holding back business investment
- New U.S. tariffs on US\$20B of Canadian exports will weigh on economic growth, and together with Canadian countermeasures, will put upward pressure on the prices of targeted products
- Excluding higher fuel costs, CPI inflation is trending close to the 2% target amid moderate wage growth and easing shelter costs
- The Bank of Canada is expected to keep policy rates steady at 2.25% this year due to subdued inflation and trade policy uncertainty

United States

- Despite tariffs and higher energy prices, the U.S. economy remains resilient largely due to substantial investment in AI infrastructure and expansionary fiscal policies, and is expected to continue growing at a >2% rate in 2026
- Inflation remains elevated partly due to higher gasoline costs but is expected to decline gradually as solid productivity growth has contained labour cost pressures
- The Fed is expected to hold policy rates steady this year due to higher inflation, before reducing rates in late 2027 as oil prices and inflation decline

This page contains forward-looking statements. Refer to the Caution Regarding Forward-Looking Statements on page 2
1-2 Refer to endnotes on pages 54-56

Canadian economic overview

- Canada's economy is well-diversified by sector
- Real GDP is expected to grow modestly in 2026 with support from expansionary fiscal policies partly offset by slower population growth and weak business investment stemming from uncertain trade policies
- Housing market activity is stabilizing and should expand modestly in response to pent-up demand and improving affordability in Ontario and B.C.
- Canada's economy is positioned to benefit from recent developments, notwithstanding the impact from U.S. tariffs, including:
 - Exposure to high demand resources (energy, minerals)
 - Federal government policies focused on accelerating projects for infrastructure, energy, critical minerals, and defence, while reducing provincial trade barriers and regulations
 - \$25 billion Sovereign Wealth Fund seeking private sector participation
 - Following recent moves to right-size population growth, immigration should become a source of economic growth in the medium term
 - Skilled workforce and high education levels, including in sciences and engineering
 - Stable political system and sound banking system
 - While USMCA renegotiation is a risk, most goods continue to cross the border duty-free. In addition, Canada has taken steps to further diversify its trading relationships

This page contains forward-looking statements. Refer to the Caution Regarding Forward-Looking Statements on page 2
Refer to endnotes on pages 54-56

Canadian GDP by Industry

Real GDP Growth Rates (%)

Canadian economic overview

- The unemployment rate has fallen to a two-year low of 6.4% in June due to an employment rebound and immigration curbs that have slowed growth in the labour force. A strengthening economy should reduce the unemployment rate modestly further in 2027
- Canadian CPI inflation was moderate at 2.8% in June and is even lower excluding higher gasoline costs. Underlying inflation remains subdued due to earlier weakness in the economy
- The Bank of Canada will likely remain on hold this year and next, with policy rates providing modest support to the economy, though this outlook assumes that oil prices do not rise materially further and cause a generalized rise in inflation, an event that could lead to tighter policy

Interest Rates (%)

Unemployment Rate and Employment Growth (%)

Consumer Price Index (%)

This page contains forward-looking statements. Refer to the Caution Regarding Forward-Looking Statements on page 2
Refer to endnotes on pages 54-56

Canadian housing market overview

National sales are expected to rise modestly in the second half of 2026 amid pent-up demand. Prices are beginning to bottom in Ontario and should rise modestly in 2027 as affordability improves

Existing home sales rose for a fourth consecutive month in July. Demand has firmed amid improving affordability in Ontario and B.C.

Benchmark prices rose in July for the first time since late 2024 but are down 3.3% in the past year. Softness in Ontario and B.C. is partly offset by higher prices in other regions

Sound lending standards across the banking system and the prevalence of full-recourse lending limit risks to credit quality and financial stability

Canadian House Price Index¹

Liquidity & Wholesale Funding Mix

BMO maintains a sizeable portfolio of high-quality liquid assets and meets all regulatory liquidity metrics

- BMO has \$391 billion in net unencumbered high quality liquid assets for the quarter ended July 31, 2026. BMO’s liquid assets are primarily held in the Bank’s trading business and in supplemental liquid asset pools maintained for contingent liquidity purposes
- Liquid assets primarily consist of deposits with central banks, sovereign and provincial government debt, U.S. agency securities, investment grade corporate debt and traded equities that are hedged through derivative transactions with third parties
- Liquidity metrics remain strong through July 31, 2026, and well above regulatory requirements
 - Average daily Liquidity Coverage Ratio (LCR¹) of 125%
 - Net Stable Funding Ratio (NSFR²) of 114%

Liquidity Metrics

Diversified wholesale term funding program

- BMO's wholesale funding principles seek to match the term of assets with the term of funding. Loans for example are funded with customer deposits and capital, with any difference funded with longer-term wholesale funding
- BMO maintains a well-diversified funding platform across markets, products, terms, currencies and maturities
- Senior unsecured, secured and capital programs provide BMO with diversification and cost-effective funding

5. Percentages determined excluding results in Corporate Services
6. Other Commercial includes industry segments that are each <1% of commercial gross loans and acceptances

Slide 13

1. Merchant services are provided in partnership with Moneris in Canada and Elavon in the U.S.

Slide 16

1. PCL Impaired ratio is calculated as the annualized total provision for credit losses on impaired loans as a percentage of average net loans and acceptances
2. Historical averages are from F1990-F2025
3. Peer average is based on historical public disclosures (F1990-F2025) from the Canadian peer group which includes The Bank of Nova Scotia, Canadian Imperial Bank of Commerce, National Bank of Canada, Royal Bank of Canada and the Toronto-Dominion Bank

Endnotes

Slide 19

- U.S. Operations comprises reported and adjusted results recorded in U.S. Banking and our U.S. operations in Capital Markets and Corporate Services

Slide 20

- Announced divestitures include the sale of certain U.S. branches, the sale of Transportation and Vendor Finance businesses and the sale of jointly-owned Moneris Solutions Corporation. Subject to regulatory approvals and customary closing conditions
- Internal capital generation reflects earnings less dividends
- The impact of FX movements on the CET1 Ratio largely offset

Slide 21

- Effective the first quarter of fiscal 2026, we report net interest margin on a basis that excludes net interest income from our Global Markets business in Capital Markets, and average earning assets from our Global Markets and Insurance businesses. Management considers this measure to be useful in allowing readers to assess performance of BMO's lending, investing and deposit-raising activities without the volatility that may be associated with market and trading-related activities. This measure replaces net interest margin, excluding trading and insurance previously disclosed, and prior periods have been reclassified to conform with the current period's presentation. Refer to reconciliation on page 62
- Sensitivities assume immediate and sustained parallel shift in interest rates and using a constant balance sheet except for the -25bps and +25bps short rate scenario where only short-term rates are shocked. For more details see the Structural (Non-Trading) Market Risk section of BMO's Third Quarter 2026 MD&A
- Includes Canadian dollar and other currencies
- Chart displays historical Canadian Overnight Repo Rate Average (CORRA) swap rates and Secured Overnight Financing Rate (SOFR) swap rates. Source: Bloomberg, updated through July 31, 2026; Implied forward rates are calculated using July 31, 2026 Bloomberg spot curve

Slide 23

- Ranked #2 in market share based on business loans, \$1MM-\$100MM. Source: Canadian Bankers Association (December 2025)

Slide 24

- Commercial lending excludes commercial and small business cards. Commercial and small business cards balances represented 14% of total credit card portfolio Q3'25 – Q3'26
- Active digital users is number of retail deposit customers that logged into online or mobile in the last 90 days, and number of commercial users active as at Q3'25 and Q3'26

Slide 25

- National Information Center: FRY-9C Reports June 30, 2026 and internal analysis
- Taxable equivalent basis (teb) amounts (Q3'26 US\$4MM; Q3'25 US\$6MM) were recorded in net interest income revenue and provision for income taxes and reflected in the ratios, and offset in Corporate Services

Slide 26

- Revenue is presented on a taxable equivalent basis (teb). This teb adjustment (Q3'26 US\$4MM; Q2'26 US\$4MM; Q1'26 US\$5MM; Q4'25 US\$6MM; Q3'25 US\$6MM) is offset in Corporate Services
- Active digital users is number of retail deposit customers that logged into online or mobile in the last 90 days, and number of commercial users active as at Q3'25 and Q3'26

Slide 29

- Taxable equivalent basis (teb) amounts (Q3'26 \$2MM; Q3'25 \$2MM) are reflected in net interest income, total revenue, provision for income taxes and the ratios, and offset in Corporate Services

Slide 30

- Revenue is stated on a taxable equivalent basis (teb). This teb adjustment (Q3'26 \$2MM; Q2'26 \$2MM; Q1'26 \$2MM; Q4'25 \$2MM; Q3'25 \$2MM) is offset in Corporate Services

Slide 32

- Gross Loans and Acceptances Canada & Other includes approx. \$10.6B from other countries
- Other Business and Government includes all industry segments that are each <1% of total loans
- Corporate Services loans are included in Canadian P&C or U.S. Banking based on country of risk
- Wholesale borrowers most sensitive to tariffs represents a subset of industries within Manufacturing, Agriculture, Construction, Forest Products, Wholesale Trade, and Other sub-sectors

Slide 33

- Includes U.S. Private Wealth balances as applicable

Slide 34

- Q2'26 and Q3'26 included Allowance on performing loans (APL) on other assets of \$25MM and \$21MM respectively, and excluded APL on securities of \$13MM and \$9MM respectively
- Includes U.S. Private Wealth balances as applicable

Slide 35

- Total Business and Government includes gross impaired loans (GIL) of \$5MM from other countries
- Other Business and Government includes industry segments that are each <1% of total GIL

Slide 36

- Other includes Mining, Government, Communications, Forest Products and Other

Slide 37

- Based on the location of the collateral or the borrower for REITs
- Other U.S. and Other Canada includes geographies that are each less than 2% of the total CRE Gross Loans & Acceptances
- Other Property Type includes commercial real estate loans for self-storage, parking, marinas and other minor sub-categories

Slide 38

- PCL ratios by category are calculated as the annualized provision for credit losses on impaired loans as a percentage of gross loans and acceptances at the end of the period

Slide 39

- Loan-to-value (LTV) is the ratio of outstanding mortgage balance or the HELOC authorization to the original property value indexed using Teranet data. Portfolio LTV is the combination of each individual mortgage or HELOC LTV weighted by the mortgage balance or HELOC authorization. Originations represent accounts originated in the quarter

Endnotes

Slide 40

1. Current average loan-to-value (LTV) is the ratio of outstanding mortgage balance to the original property value indexed using Teranet data. Portfolio LTV is the combination of each individual mortgage LTV weighted by the mortgage balance
2. The average payment increase reflects an assumed interest rate of 4.25% at renewal and includes regular payments and additional pre-payments made to date

Slide 47

3. Credit ratings are not recommendations to purchase, hold or sell a financial obligation and do not address the market price or suitability for a particular investor. Ratings are subject to revision or withdrawal at any time by the rating organization. Our rating classes may differ from the rating category nomenclatures used by the rating agencies (e.g. Fitch Issuer Default Rating assigned to BMO is "AA-"). As at July 31, 2026
4. Issuer Rating is applicable to any long-term senior unsecured debt issued that is excluded from the Bail-In Regime
5. Subject to conversion under the Bank Recapitalization (Bail-In) Regime

Slide 48

1. Indicated dollar amounts beside each wholesale funding program denotes program issuance capacity limits
2. The program allows for offerings in reliance upon Regulation S and Rule 144A under the Securities Act as applicable
3. Wholesale capital market term funding primarily includes non-structured senior funding, covered bonds and term ABS. Excludes capital issuances
4. As of Oct 31, 2025, wholesale term maturities for F2026 were \$31B

Slide 49

1. Common Equity Tier 1 (CET1), Additional Tier 1, Tier 2 and Total Capital ratios are in accordance with the Capital Adequacy Requirements (CAR) Guideline as set out by the Office of the Superintendent of Financial Institutions (OSFI)
2. TLAC Ratio is disclosed in accordance with Office of the Superintendent of Financial Institutions' (OSFI) Total Loss Absorbing Capacity (TLAC) Guideline. Common Equity Tier 1 (CET1), Additional Tier 1, Tier 2 and Other TLAC capital are disclosed in accordance with OSFI Capital Adequacy Requirements (CAR) Guideline

3. The Domestic Stability Buffer (DSB) can range from 0% to 3.0% of risk-weighted assets (RWA) and is currently 3.0% as of July 31, 2026
4. Percentages are based on CAD amounts as of July 31, 2026
5. Preferred Shares - Series 44
6. Preferred Shares - Series 50 and 52
7. LRCN is an acronym for Limited Recourse Capital Notes

Glossary

Adjusted Earnings and Measures

Adjusted earnings and Measures are non-GAAP and exclude certain specified items from revenue, non-interest expense, provision for credit losses and income taxes that may not reflect ongoing business performance. Management considers both reported and adjusted results to be useful in assessing underlying ongoing performance

Allowance on Performing Loans

Allowance on Performing Loans is maintained to cover impairment in the existing portfolio for loans that have not yet been individually identified as impaired

Allowance on Performing Loans Ratio

Allowance on Performing Loans ratio is calculated as the allowance for credit losses on performing loans as a percentage of gross performing loans and acceptances

Assets Under Administration (AUA)

Assets under Administration (AUA) refers to the assets administered by the bank, including assets under custody, that are beneficially owned by clients and therefore not reported on the bank's consolidated balance sheet. BMO provides administrative services for these assets, including safekeeping, recordkeeping, income collection and distribution, and reporting

Assets under Management (AUM)

Assets under Management (AUM) refers to the total market value of assets beneficially owned by clients and managed by the bank. Services provided in respect of AUM include the provision of investment advice and discretionary portfolio management. AUM is not reported on the bank's consolidated balance sheet

Average Earning Assets

Average Earning Assets represents the daily average balance of deposits at central banks, deposits with other banks, securities borrowed or purchased under resale agreements, securities, and loans over a period

Common Equity Tier 1 (CET1) Capital

Common Equity Tier 1 (CET1) Capital comprises common shareholders' equity, including applicable contractual service margin, less regulatory deductions for goodwill, intangible assets, pension assets, certain deferred tax assets and other items, which may include a portion of expected credit loss provisions or a shortfall in allowances or other specified items

Common Equity Tier 1 (CET1) Ratio

Common Equity Tier 1 (CET1) Ratio is calculated as CET1 Capital divided by risk-weighted assets. The CET1 Ratio is calculated in accordance with OSFI's Capital Adequacy Requirements (CAR) Guideline

Efficiency Ratio

Efficiency Ratio (or Expense-to-Revenue Ratio) is a measure of productivity. It is a percentage calculated as non-interest expense divided by total revenue (on a taxable equivalent basis in the operating segments)

Gross Impaired Loans and acceptances (GIL) ratio

Gross Impaired Loans (GIL) Ratio is calculated as gross impaired loans and acceptances as a percentage of gross loans and acceptances

High-Quality Liquid Assets (HQLA)

High-Quality Liquid Assets (HQLA) High-Quality Liquid Assets (HQLA) are cash or assets that can be converted into cash with little or no loss in value to meet short-term liquidity needs

Leverage Ratio

Leverage Ratio is a Basel III regulatory measure calculated as Tier 1 Capital divided by LE, in accordance with OSFI's Capital Adequacy Requirements (CAR) Guideline

Liquidity Coverage Ratio (LCR)

Liquidity Coverage Ratio (LCR) is a Basel III regulatory metric calculated as the ratio of high-quality liquid assets to total net stressed cash outflows over a thirty-day period under a stress scenario, in accordance with guidelines issued by OSFI

Net Interest Margin (NIM)

Net Interest Margin is the ratio of net interest income to average earning assets, expressed as a percentage or in basis points

Net Interest Margin, excluding Global Markets and Insurance

Net Interest Margin, excluding Global Markets and Insurance is the ratio of net interest income, excluding net interest income from our Global Markets business in Capital Markets to average earning assets, excluding Global Markets and Insurance average earning assets, expressed as a percentage or in basis points

Operating Leverage

Operating Leverage is the difference between the growth rates of revenue and non-interest expense

Net Stable Funding Ratio (NSFR)

Net Stable Funding Ratio (NSFR) is a regulatory liquidity measure that assesses the stability of a bank's funding profile in relation to the liquidity value of its assets, calculated in accordance with OSFI's Liquidity Adequacy Requirements (LAR) Guideline

Pre-Provision, Pre-Tax Earnings (PPPT)

Pre-Provision, Pre-Tax Earnings (PPPT) is a non-GAAP measure, calculated as income before provision for income taxes and provision for (recovery of) credit losses. We use PPPT on both a reported and an adjusted basis to assess our ability to generate sustained earnings growth excluding credit losses, which are impacted by the cyclical nature of a credit cycle

Provision for Credit Losses (PCL) Ratio

Provision for Credit Losses (PCL) Ratio is calculated as the annualized total provision for credit losses as a percentage of average net loans and acceptances

Provision for Credit Losses (PCL) Impaired Loans Ratio

Provision for Credit Losses (PCL) Impaired Loans Ratio is calculated as the annualized total provision for credit losses on impaired loans as a percentage of average net loans and acceptances

Provision for Credit Losses (PCL) Performing Loans Ratio

Provision for Credit Losses (PCL) Performing Loans Ratio is calculated as the annualized provision for credit losses on performing loans as a percentage of average net loans and acceptances

Glossary

Return on Assets (ROA)

Return on Assets (ROA) is calculated as net income, as a percentage of average assets

Return on Equity or Return on Common Shareholders' Equity (ROE)

Return on Equity or Return on Common Shareholders' Equity (ROE) is calculated as net income, less preferred dividends and distributions on other equity instruments, as a percentage of average common shareholders' equity. Common shareholders' equity comprises common share capital, contributed surplus, accumulated other comprehensive income (loss) and retained earnings

Return on Tangible Common Equity (ROTCE)

Return on Tangible Common Equity (ROTCE) is a non-GAAP measure and calculated as net income available to common shareholders, adjusted for the amortization of acquisition-related intangible assets and any impairments, as a percentage of average tangible common equity

Risk-Weighted Assets (RWA)

Risk-Weighted Assets (RWA) are on- and off-balance sheet exposures adjusted by a regulatory risk-weighted factor to a comparable risk level, in accordance with guidelines issued by OSFI

Taxable Equivalent Basis (TEB)

Operating segment revenue is presented on a taxable equivalent basis (teb). Net interest income, total revenue and provision for income taxes in Capital Markets and U.S. Banking are increased on tax exempt securities to an equivalent pre-tax basis to facilitate comparisons of income between taxable and tax-exempt sources, and are reflected in the key metrics. The offset to operating segment teb adjustments is reflected in Corporate Services net interest income, revenue and provision for (recovery of) income taxes

Tier 1 Capital

Tier 1 Capital comprises CET1 Capital and Additional Tier 1 (AT1) Capital. AT1 Capital consists of preferred shares, limited recourse capital notes, less regulatory deductions

Tier 2 Capital

Tier 2 Capital comprises subordinated debentures and may include certain credit loss provisions, less regulatory deductions

Total Capital

Total Capital comprises Tier 1 and Tier 2 Capital

Total Loss Absorbing Capacity (TLAC)

Total Loss Absorbing Capacity (TLAC) comprises Total Capital and senior unsecured debt subject to the Canadian Bail-In Regime, less regulatory deductions, in accordance with guidelines issued by OSFI

Total Loss Absorbing Capacity (TLAC) Ratio

Total Loss Absorbing Capacity (TLAC) Ratio is calculated as TLAC divided by risk-weighted assets

Total Shareholder Return

Total Shareholder Return (TSR) represents the average annual total return earned on an investment in BMO common shares made at the beginning of the respective period. It includes the change in share price and assumes dividends received were reinvested in additional common shares

Non-GAAP and Other Financial Measures

Results and measures in this document are presented on a generally accepted accounting principles (GAAP) basis. Unless otherwise indicated, all amounts are in Canadian dollars and have been derived from our audited annual consolidated financial statements and our unaudited interim consolidated financial statements, prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). References to GAAP mean IFRS. We use a number of financial measures to assess our performance, as well as the performance of our operating segments, including amounts, measures and ratios that are presented on a non-GAAP basis, as described below. We believe that these non-GAAP amounts, measures and ratios, read together with our GAAP results, provide readers with a better understanding of how management assesses results.

Management considers both reported and adjusted results and measures to be useful in assessing underlying ongoing business performance. Adjusted results and measures remove certain specified items from revenue, non-interest expense and income taxes, as detailed on page 60. Adjusted results and measures presented in this document are non-GAAP. Presenting results on both a reported basis and an adjusted basis permits readers to assess the impact of certain items on results for the periods presented, and to better assess results excluding those items that may not reflect of ongoing business performance. As such, the presentation may facilitate readers' analysis of underlying trends. Except as otherwise noted, management's discussion of changes in reported results in this document applies equally to changes in the corresponding adjusted results.

Non-GAAP amounts, measures and ratios do not have standardized meanings under GAAP. They are unlikely to be comparable to similar measures presented by other companies and should not be viewed in isolation from, or as a substitute for, GAAP results.

Examples of non-GAAP amounts, measures or ratios include: pre-provision pre-tax income, tangible common equity, amounts presented net of applicable taxes, adjusted net income, revenues, non-interest expenses, earnings per share, return on equity, return on tangible common equity, and adjusted efficiency, operating leverage, growth rates and other measures calculated using adjusted results, which exclude the impact of certain items, such as divestitures, acquisition and integration costs and amortization of acquisition-related intangible assets. BMO provides supplemental information on combined operating segments to facilitate comparisons to peers.

Certain information contained in BMO's Management's Discussion and Analysis (MD&A) as at August 25, 2026 for the period ended July 31, 2026 ("Third Quarter 2026 MD&A") and BMO's MD&A as at February 25, 2026 for the period ended January 31, 2026 ("First Quarter 2026 MD&A") is incorporated by reference into this document. Quantitative reconciliations of non-GAAP and other financial measures to the most directly comparable financial measures in BMO's financial statements for the period ended July 31, 2026 and for the period ended January 31, 2026, an explanation of how non-GAAP and other financial measures provide useful information to investors and any additional purposes for which management uses such measures, can be found in the Non-GAAP and Other Financial Measures section of the Third Quarter 2026 MD&A and the First Quarter 2026 MD&A, and Table 15 of the Third Quarter 2026 MD&A and First Quarter 2026 MD&A. For further information regarding the composition of our supplementary financial measures, refer to the Glossary on pages 57-58, and Glossary of Financial Terms section of the Third Quarter 2026 MD&A, which is available online at www.bmo.com/investorrelations and at www.sedarplus.ca.

Certain comparative figures have been reclassified to conform with the current year's presentation.

Adjusting Items

Adjusted results in the current quarter and prior periods excluded the following items:

- Impact of divestitures of \$1,106 million (\$973 million after-tax) in the current quarter included the announced sale of BMO's Transportation Finance and Vendor Finance businesses resulting in a charge of \$1,092 million (\$962 million after-tax), primarily related to goodwill, as well as divestiture-related costs related to the announced sale of 138 branches in select U.S. markets of \$14 million (\$10 million after-tax). Prior periods included costs related to the sale of branches of \$26 million (\$24 million after-tax) in Q2-2026 and \$4 million (\$3 million after-tax) in Q1-2026. Amounts are recorded in non-interest expense in Corporate Services.
- Acquisition and integration costs of \$6 million (\$4 million after-tax) in the current quarter. Prior periods included expenses of \$3 million (\$2 million after-tax) in Q2-2026, \$9 million (\$7 million after-tax) in Q1-2026, \$5 million (\$4 million after-tax) in Q3-2025, a reversal of \$2 million (\$1 million after-tax) in Q2-2025 and expenses of \$10 million (\$7 million after-tax) in Q1-2025. Amounts are recorded in non-interest expense in the related operating segment: Burgundy in Wealth Management and Bank of the West in Corporate Services.
- Amortization of acquisition-related intangible assets of \$94 million (\$69 million after-tax) in the current quarter. Prior periods included \$93 million (\$70 million after-tax) in Q2-2026, \$96 million (\$71 million after-tax) in Q1-2026, \$93 million (\$69 million after-tax) in Q3-2025, \$109 million (\$81 million after-tax) in Q2-2025 and \$106 million (\$79 million after-tax) in Q1-2025. Amounts are recorded in non-interest expense in the related operating segment.
- Change in fair value of contingent consideration related to the acquisition of Burgundy, recorded in non-interest revenue in Wealth Management. The increase in contingent consideration and reduction in non-interest revenue was \$63 million (pre-tax and after-tax) in the current quarter, \$7 million (pre-tax and after-tax) in Q2-2026 and \$16 million (pre-tax and after-tax) in Q1-2026. For further information, refer to Note 13 of the unaudited interim consolidated financial statements and Note 9 of the audited annual consolidated financial statements of BMO's 2025 Annual Report.
- U.S. Federal Deposit Insurance Corporation (FDIC) special assessment recorded in non-interest expense in Corporate Services. Q1-2026 included a partial reversal of a prior charge of \$47 million (\$35 million after-tax). Prior periods included a partial reversal of \$5 million (\$4 million after-tax) in Q3-2025, expenses of \$5 million (\$4 million after-tax) in Q2-2025 and a partial reversal of \$7 million (\$5 million after-tax) in Q1-2025.
- Impact of aligning accounting policies for employee vacation across legal entities of \$96 million (\$70 million after-tax) in Q1-2025, recorded in non-interest expense in Corporate Services.

Adjusted results and measures are non-GAAP.

Pre-Provision, Pre-Tax Earnings (PPPT) is a non-GAAP measure, calculated as income before provision for income taxes and provision for (recovery of) credit losses. We use PPPT on both a reported and an adjusted basis to assess our ability to generate sustained earnings growth excluding credit losses, which are impacted by the cyclical nature of a credit cycle

Refer to the Non-GAAP and Other Financial Measures section of BMO's Third Quarter 2026 MD&A, BMO's First Quarter 2026 MD&A, and BMO 2025 Annual MD&A

Adjusted results and measures are non-GAAP

Pre-Provision, Pre-Tax Earnings (PPPT) is a non-GAAP measure, calculated as income before provision for income taxes and provision for (recovery of) credit losses. We use PPPT on both a reported and an adjusted basis to assess our ability to generate sustained earnings growth excluding credit losses, which are impacted by the cyclical nature of a credit cycle

Acquisition and integration costs are recorded in non-interest expense in the related operating segments. Costs related to the acquisition Bank of the West were recorded in Corporate Services

U.S. Operations comprises reported and adjusted results recorded in U.S. Banking and our U.S. operations in Capital Markets and Corporate Services

U.S. Banking and Capital Markets taxable equivalent basis (teb) amounts were recorded in net interest income, total revenue and provision for income taxes and reflected in the ratios, with offsets recorded in Corporate Services

Effective the first quarter of fiscal 2026, we report net interest margin on a basis that excludes net interest income from our Global Markets business in Capital Markets, and average earning assets from our Global Markets and Insurance businesses. Management considers this measure to be useful in allowing readers to assess performance of BMO's lending, investing and deposit-raising activities without the volatility that may be associated with market and trading-related activities. This measure replaces net interest margin, excluding trading and insurance previously disclosed, and prior periods have been reclassified to conform with the current period's presentation

Adjusted results and measures are non-GAAP

Return on Tangible Common Equity (ROTCE) is a non-GAAP measure and calculated as net income available to common shareholders, adjusted for the amortization of acquisition-related intangible assets and any impairments, as a percentage of average tangible common equity. Acquisition and integration costs are recorded in non-interest expense in the related operating segments. Costs related to the acquisition of Burgundy were recorded in Wealth Management, Bank of the West in Corporate Services, AIR MILES in Canadian P&C, and Radicle in Capital Markets. U.S. Operations comprises reported and adjusted results recorded in U.S. Banking and our U.S. operations in Capital Markets and Corporate Services.
