Use of this Document

The supplemental information contained in this package is designed to improve the readers' understanding of the financial performance of BMO Financial Group (the Bank). This information should be used in conjunction with the Bank's Third Quarter 2026 Report to Shareholders and the 2025 Annual Report available on the Canadian Securities Administrators' website at www.sedarplus.ca and BMO's website at www.bmo.com/investorrelations.

Additional financial information is also available in the Q3 2026 Supplementary Regulatory Capital Information and the Q3 2026 Investor Presentation which can be accessed at our website at www.bmo.com/investorrelations.

This report is unaudited and all amounts are in millions of Canadian dollars, unless indicated otherwise. Items indicated n.a. were not applicable.

Operating Segment Results

BMO reports financial results for its four operating segments, all of which are supported by Corporate Units and Technology and Operations (T&O) within Corporate Services. Operating segment results include allocations from Corporate Services for treasury-related revenue, corporate and T&O costs, and capital. For more information, see the "How BMO Reports Operating Group Results" section of the 2025 BMO Annual MD&A.

Non-GAAP and Other Financial Measures

Results and measures in this document are presented on a GAAP basis. Unless otherwise indicated, all amounts are in Canadian dollars and have been derived from our audited annual consolidated financial statements, prepared in accordance with International Financial Reporting Standards (IFRS). References to GAAP mean IFRS. We use a number of financial measures to assess our performance, as well as the performance of our operating segments, including amounts, measures and ratios that are presented on a non-GAAP basis, as described below. We believe that these non-GAAP amounts, measures and ratios, read together with our GAAP results, provide readers with a better understanding of how management assesses results.

Non-GAAP amounts, measures and ratios do not have standardized meanings under GAAP. They are unlikely to be comparable to similar measures presented by other companies and should not be viewed in isolation from, or as a substitute for, GAAP results.

Certain information contained in BMO's Management's Discussion and Analysis as at August 25, 2026 for the period ended July 31, 2026 ("Third Quarter 2026 Report to Shareholders") is incorporated by reference into this document. Further information regarding the composition of our non-GAAP and other financial measures is provided in the "Glossary of Financial Terms" section of the Third Quarter 2026 Report to Shareholders. The Third Quarter 2026 Report to Shareholders is available on the Canadian Securities Administrators' website at www.sedarplus.ca and on our website at www.bmo.com/investorrelations.

Our non-GAAP measures broadly fall into the following categories of Adjusted measures and ratios, Tangible common equity and return on tangible common equity:

Adjusted measures and ratios

Management considers both reported and adjusted results and measures useful in assessing underlying ongoing business performance. Adjusted results and measures remove certain specified items from revenue, non-interest expense and income taxes, as detailed on page 2. Adjusted results and measures presented in this document are non-GAAP. Presenting results on both a reported basis and an adjusted basis permits readers to assess the impact of certain items on results for the periods presented, and to better assess results excluding those items that may not be reflective of ongoing business performance. As such, the presentation may facilitate readers' analysis of trends.

Tangible common equity and return on tangible common equity

Tangible common equity is calculated as common shareholders' equity, less goodwill and acquisition-related intangible assets, net of related deferred tax liabilities. Return on tangible common equity is calculated as net income available to common shareholders, adjusted for the amortization of acquisition-related intangible assets, as a percentage of average tangible common equity.

Return on Equity by Operating Segment

Capital is allocated to the operating segments based on the amount of regulatory capital required to support business activities, including risk weight assets and capital deductions. Effective the first quarter of fiscal 2026, the allocation approach was updated to primarily reflect an increased capital allocation rate 12.5% of risk weighted assets effective the first quarter of fiscal 2026 compared with 12.0% in fiscal 2025. Unallocated capital is reported in Corporate Services.

Net Interest Margin, excluding Global Markets and Insurance

Effective the first quarter of fiscal 2026, we report net interest margin on a basis that excludes net interest income from our Global Markets business in Capital Markets, and average earning assets from our Global Markets and Insurance businesses. Management considers this measure to be useful in allowing readers to assess performance of BMO's lending, investing and deposit-raising activities without the volatility that may be associated with market and trading-related activities. This measure replaces Net Interest Margin, excluding trading and insurance previously disclosed, and prior periods have been reclassified to conform with the current period's presentation.

Presenting results on a taxable equivalent basis (teb)

We analyze revenue at the consolidated level based on GAAP revenue as reported in the audited annual consolidated financial statements, rather than on a taxable equivalent basis (teb). Similar to many banks, BMO analyzes revenue on a teb basis at the operating segment level. Net Interest income, revenue and the provision for income taxes in Capital Markets and U.S. Banking are increased on tax-exempt securities to equivalent pre-tax amounts in order to facilitate comparisons of income from taxable and tax-exempt sources, and are reflected in the ratios. The offset to the segment teb adjustments is reflected in Corporate Services net interest income, revenue and provision for (recovery of) income taxes.

Changes

Periodically, certain lines of business and units within our organizational structure are realigned to support our strategic priorities. In addition, revenue and expense allocations, including between operating segments, are updated to more accurately align with these priorities. Results for prior periods are reclassified to conform to the current period presentation.

Users may provide their comments and suggestions on the Supplementary Financial Information document by contacting Bill Anderson at (416) 867-7834 or bill2.anderson@bmo.com, or Perry Chen-See at (416) 359-8074 or perry.chensee@bmo.com

(1) Price to earnings multiple is calculated as closing share price divided by earnings per share (EPS) on a trailing four quarters basis.

(2) This is a non-GAAP ratio. Refer to the "Non-GAAP and Other Financial Measures" section on page 1 in this document and in BMO's Third Quarter 2026 Report to Shareholders for further information.

(3) Issuer rating is applicable to any long-term senior unsecured debt issued that is excluded from the Bank Recapitalization (Bail-In) Regime.

(4) Subsequent to the end of the second quarter, Fitch upgraded BMO's Long-term deposits/issuer rating from "AA" to "AA+" on May 12, 2026.

(5) Subject to conversion under the Bank Recapitalization (Bail-In) Regime.

(1) Corporate Services Revenue, provision for income taxes and associated measures and ratios are presented on a taxable equivalent (teb) basis. Refer to the "Note to Users" section on page 1 in this document and in BMO's 2025 Annual MD&A for further information.

(2) These are non-GAAP measures and ratios. Refer to the "Non-GAAP and Other Financial Measures" section on page 1 in this document and in BMO's Third Quarter 2026 Report to Shareholders for further information. For a reconciliation of reported to adjusted results see the Notes to Users section.

(3) Operating segment average common equity and return on equity measures are based on allocated capital. For further information, refer to Notes to Users section on page 1.

Prior period amounts have been reclassified to conform to the current period presentation.

(1) Trading related revenue presented on a taxable equivalent basis (teb) is a non-GAAP measure. BMO analyzes trading-related revenue on a taxable equivalent basis (teb) which reflects an increase in net interest income on tax exempt securities to equivalent pre-tax amounts and is useful in facilitating comparisons of income from taxable and tax-exempt sources. For further information, refer to the "Notes to Users" section on page 1 in this document and in BMO's Third Quarter 2026 Report to Shareholders for further information.

Trading revenues include interest and other income earned on trading securities and other cash instruments held in trading portfolios, less internal and external funding costs associated with trading-related derivatives and cash instruments, and realized and unrealized gains and losses on trading securities, other cash instruments, derivatives and foreign exchange activities.

Interest rates includes Canadian and other government securities, corporate debt instruments and interest rate and credit derivatives.

Foreign exchange includes foreign exchange spot and foreign exchange derivatives contracts from our wholesale banking business.

Equities includes institutional equities and equity derivatives.

Commodities includes commodity swaps, forwards, and options contracts.

Other includes the impact of hedging exposures in our structural balance sheet, and fair value changes on other non-trading derivatives.

(1) Segmented credit information by geographic area is based upon the country of ultimate risk.

(2) Aggregate Net Loans and Acceptances balances are net of allowance for credit losses on performing and impaired loans (excluding those related to off-balance sheet instruments).

(3) Net impaired loan balances are net of allowance for credit losses on impaired loans, excluding those related to off-balance sheet instruments.

(4) Excludes allowances related to off-balance sheet instruments.

- (1) Pledged as collateral refers to the portion of on-balance sheet assets and other cash and securities that are pledged through repurchase agreements, securities lending, derivative contracts, minimum required deposits at central banks, and requirements associated with participation in clearing houses and payment systems. Other encumbered assets include assets that are restricted for legal or other reasons, such as minimum required deposits at central banks, short sales, and certain U.S. agency securities that have been sold to third parties but are consolidated under IFRS.
- (2) Other unencumbered assets include select liquid asset holdings that management believes are not readily available to support the Bank's liquidity requirements. These include securities held at the Bank's insurance subsidiary, seller financing securities, and certain investments held at our merchant banking business. Other unencumbered assets also include mortgages and loans that may be securitized to access secured funding.
- (3) Loans included in available as collateral represent loans currently lodged at central banks that may be used to access central bank funding. Loans available for pledging as collateral do not include other sources of additional liquidity that may be realized from BMO's loan portfolio, such as incremental securitization, covered bond issuances and FHLB advances.
- (4) Under IFRS, NHA mortgage-backed securities that include mortgages owned by the Bank as the underlying collateral are classified as loans. Unencumbered NHA mortgage-backed securities have liquidity value and are included as liquid assets under the Bank's Liquidity and Funding Risk Management Framework. This amount is shown as a separate line item, NHA mortgage-backed securities.

(1) Customer deposits are operating and savings deposits, including term investment certificates and retail structured deposits, primarily sourced through our retail, commercial, wealth and corporate banking businesses. Effective Q3 2026, the classification of retail structured deposits was updated to align with categorization under OSFI's Liquidity Adequacy Requirements beginning May 1, 2026.
